

# Snowmobile SUPERCLAMP

SUPERCLAMP for snowmobiles, displayed by Randall and Don Bowman (BowDriks Ind. Ltd., Calgary, AB) assisted by PSN Personality Julie, clamps down snowmobiles in a minute. Clamp holds sled skis firmly to trailer, eliminating need for untidy tie-downs. Big Mountain BC snowmobiler Geoff Kyle took time off from dropping up to 130 feet off mountains for film shoots to say about his front and rear SUPERCLAMP sets – “After a long day riding the last thing you want to do is start screwing around with tie-downs. The SUPERCLAMP drops into place across the skis, then its easy to screw it down with gloves on. I never have to worry about a sled breaking loose even after bouncing over potholes – and the quality is high grade. Low, low maintenance.” [www.superclamps.net](http://www.superclamps.net)

# OFF-ROADER

2007 SUZUKI DR-Z250

MIDDLEWEIGHT off-road bikes are so popular because they offer abundant power combined with lightweight handling - such as the Suzuki DR-Z250. And when the trail gets nasty DR-Z250's long-travel suspension makes for plush ride. Compact 249cc 4-stroke, DOHC, single-cylinder, air-cooled engine with 4-valve cylinder head for low-rpm torque and tractable power. Six-speed transmission with cable-operated clutch. Lightweight off-road lighting system.
